

MANAGEMENT AND PROTECTION: Prescribed burning of uplands and into pocosins should continue where feasible. The seepage bog by Kornbow Lake should be included in the burn program. Consideration should be given to attracting red-cockaded woodpeckers (*Picoides borealis*) with artificial nest cavities. Rare plant populations in the gas line south of Shaw Road should be monitored, with adjustments to management if necessary. The site is a Registered Natural Heritage Area under a nonbinding agreement with the NC NHP.

NATURAL COMMUNITIES: Coastal Plain Semipermanent Impoundment, Coastal Plain Small Stream Swamp (Blackwater Subtype), Dry Oak-Hickory Forest, Pine/Scrub Oak Sandhill Mixed Oak Variant, Sandhill Seep Bog Variant, Streamhead Pocosin, Xeric Sandhill Scrub Sandhills Variant.

RARE PLANTS: Texas hatpins (*Eriocaulon texense*), resinous boneset (*Eupatorium resinosum*), bog spicebush (*Lindera subcoriacea*), loose watermilfoil (*Myriophyllum laxum*), Wells's pixie-moss (*Pyxidanthra barbulata* var. *brevifolia*), southern white beaksedge (*Rhynchospora macra*), feather-bristle beaksedge (*R. oligantha*), longbeak baldsedge (*R. scirpoides*), Canby's bulrush (*Schoenoplectus etuberculatus*), graceful goldenrod (*Solidago gracillima*), Harper's yellow-eyed-grass (*Xyris scabrifolia*).

RARE ANIMALS: Red-cockaded woodpecker (*Picoides borealis*), northern pine snake (*Pituophis melanoleucus melanoleucus*), eastern fox squirrel (*Sciurus niger*).
